TO WHOMSOEVER IT MAY CONCERN

MasterNet is **FSSC 22000** and **ISO 9001** certified company. MasterNet assures that the products are manufactured, stored and transported under the condition that prevents the following:

1. Chemical Contamination from pesticides, toxic elements, radioactive compounds or toxic industrial chemicals.
2. Additives which are not approved for use or used in excess of FDA and or CFIA regulations. This applies to all material that is intended for food contact.
3. Contaminations from insect, birds or rodents.
4. Degradation of the material from the elements or environment due to inadequate packaging or transportation conditions.

Materials intended for Food Contact shall comply with current FDA and or CFIA requirements. The raw materials used for food contact applications fulfill requirement of REACH/ RoHS/ RoHS 2 regulation. The raw materials used comply with Part B Division 23 of the Canadian Food Inspection and Drug regulations. The raw material used complies with the Regulation (EC) 1935/2004, Regulation (EC) 2023/2006 and Regulation (EU) 10/2011

MasterNet assures that manufacturing facility is allergen free environment. If changes are made that will impact food safety (i.e. changes in allergen), the recipient of this guarantee will be notified. MasterNet further assures that all the manufactured products are produced in Canada and can be traced back using the information in the "Identification labels". With the help of the Lot number from the identification label, MasterNet can trace back the raw materials used.
